Subject Index of Volume 43

Acetone
  and Ag(I) compounds; oxidative dimerisation of ammonia by peroxydisulphate ion in presence of, 193
Acid–base properties
  of oxidation catalyst; calorimetric study of, 327
Acid–base reactions
  homogeneous liquid phase; modelling of catalytic activity in, 51
Acid catalysis
  and preparation of sulphonated polyorganosiloxanes, 41
  role of oxidation by heteropolyacid in polycondensation of benzyl alcohol to polybenzyl initiated by, 221
Acid(s)
  dissolved formic; photo-oxidation of, by gaseous oxygen in presence of iron ions, 267
  promoting effect of, on formation of ethylene glycol from synthesis gas catalysed by Rh–tricyclohexylphosphine system, 127
Acrylic supports
  immobilized enzymes on, 259
Acyl
  -substituted pyridines in alkaline solution; high selectivity in catalytic hydrogenation of; effect of complexation by β-cyclodextrin, 21
Adsorption
  isobutene; theoretical EHT study of, on model clusters of first series transition metal oxides and MgO, 303
Alcohol
  benzyl; role of oxidation by heteropolyacid in polycondensation of, to polybenzyl initiated by its acid catalysis, 221
  ethylene glycol:
    electronic and steric effects of phosphine ligands in formation of, from synthesis gas catalysed by Rh, 249
    promoting effect of acids on formation of, from synthesis gas catalysed by Rh–tricyclohexylphosphine system, 127
  unsaturated; selective hydrogenation of cinnamic aldehyde C_6H_5CH=CHCHO to, catalysed by iridium phosphine systems, 35
Aldehyde
  cinnamic C_6H_5CH=CHCHO; selective hydrogenation of, to unsaturated alcohol catalysed by iridium phosphine systems, 35
Alkanes
  photochemical conversion of methane, 371
Alkenes, Olefins
  alkene hydrogenation catalysed by Rh complexes; correlation of rates of, 27
  cyclododecatrienes; hydroformylation of; example of catalytic selectivity induced by chelation, 353
  ethene; role of; secondary reactions of primary products of Fischer–Tropsch synthesis, 237
  ethylene into 1-butene over supported tailor-made Ni catalysts; dimerisation of, 93
  functionally substituted olefins; homogeneous Rh complex-catalysed hydroformylation and related reactions of, 15
  hex-1-ene; hydroformylation and isomerization reactions of, catalysed by Rh(I) complexes, 335
  internal olefins; Re 'melt' catalysed oxonation of; syngas reactions, 65
  isobutene adsorption; theoretical EHT study of, on model clusters of first series transition metal oxides and MgO, 303
  olefin catalysed by $W(CO)_5L$–AX_n system; photoinduced metathesis of, 161
Alumina
  catalysts; preparation, characterization and NMR spectra of Pt on, in relation to their activity and stability, 213

© Elsevier Sequoia/Printed in The Netherlands

inelastic electron tunnelling spectral (IETS) study of $Rh_6(CO)_{16}$ and $Rh_4(CO)_{12}$ absorbed on, 315
α-; thermal decomposition of $Rh_6(CO)_{16}$ on, 7
Ammonia
oxidative dimerisation of, by peroxydisulphate ion in presence of Ag(I) compounds and acetone, 193
mechanism of reaction NO + NH_3 on V_2O_5 catalysts, 359
Ammoxidation
vapour phase catalytic; synthesis of aromatic nitriles by, 117
Aromatic compounds
acyl-substituted pyridines in alkaline solution; high selectivity in catalytic hydrogenation of, effect of complexation by β-cyclodextrin, 21
aromatic nitriles; synthesis of, by vapour phase catalytic ammoxidation, 117
benzyl alcohol to polybenzyl; role of oxidation by heteropolyacid in polycondensation of, initiated by its acid catalysis, 221
cinnamic aldehyde $C_6H_5CH{=}CHCHO$ to unsaturated alcohol catalysed by iridium phosphine systems; selective hydrogenation of, 35
2-pyridylethyl copper complex fixed on silica and its dioxygen adduct, 31
Azolate bridging ligands
various; influence of, on catalytic activity of dinuclear Rh(I) precursors in hydroformylation reactions, 1

Calorimetric study
of acid–base properties of oxidation catalyst, 327
Chelation
example of catalytic selectivity induced by; hydroformylation of cyclododecatrienes, 353
Chlorine
catalytic activity of some immobilized dirhodium complexes with one bridging thiolato and one bridging chloro ligand, 199
Citrate reduction
stabilization and characterization of small Pt clusters (<1 nm) on TiO_2 powders via, 183
Clusters
model; theoretical EHT study of isobutene adsorption on, of first series transition metal oxides and MgO, 303
small Pt (<1 nm); stabilization and characterization of, on TiO_2 powders via citrate reduction, 183
Cobalt
oxidation of water by $Ru(bpy)_3^{3+}$ in presence of Co(III) and Fe(III) colloidal hydroxides as catalysts, 171
Colloidal hydroxides
Co(III) and Fe(III); oxidation of water by $Ru(bpy)_3^{3+}$ in presence of, as catalysts, 171
Complexation
effect of, by β-cyclodextrin; high selectivity in catalytic hydrogenation of acyl-substituted pyridines in alkaline solution, 21
Copper
comparative study of reactions of simple formates and acetates over, on silica; catalytic hydrogenolysis of esters, 79
FT–IR study of surface of copper oxide, 225
2-pyridylethyl copper complex fixed on silica and its dioxygen adduct, 31
Cyclodextrin
β-; effect of complexation by; high selectivity in catalytic hydrogenation of acyl-substituted pyridines in alkaline solution, 21
Cyclododecatrienes
hydroformylation of; example of catalytic selectivity induced by chelation, 353

Dextrin
effect of complexation by β-cyclodextrin; high selectivity in catalytic hydrogenation of acyl-substituted pyridines in alkaline solution, 21
Dimerisation
of ethylene into 1-butene over supported tailor-made Ni catalysts, 93
oxidative, of ammonia by peroxydisulphate ion in presence of Ag(I) compounds and acetone, 193

Dinitrogen fixation
model reaction in purported catalytic cycles of; hydrolysis and reductive hydrolysis of nitridomolybdenum(VI) complexes, 141

EHT study
theoretical, of isobutene adsorption on model clusters of first series transition metal oxides and MgO, 303
Electrochemical regeneration
of enzymatic cofactors, 153
Electronic effects
and steric effects of phosphine ligands in formation of ethylene glycol from synthesis gas catalysed by Rh, 249
Enzymatic cofactors
electrochemical regeneration of, 153
Enzymes
immobilized, on acrylic supports, 259
immobilized urease membrane; characterization of, on silicon nitride layer, 293
Esters
catalytic hydrogenolysis of; comparative study of reactions of simple formates and acetates over Cu on silica, 79

Fischer–Tropsch synthesis
EHMO calculations for chain growth process in, on supported Group VIII metals, 381
secondary reactions of primary products of; role of ethene, 237
Formic acid
dissolved; photo-oxidation of, by gaseous oxygen in presence of iron ions, 267

Group VIII metals
supported; EHMO calculations for chain growth process in Fischer–Tropsch synthesis on, 381

Heteropolyacid
role of oxidation by, in polycondensation of benzyl alcohol to polybenzyl initiated by its acid catalysis, 221
Hydantoin
D, L-5-isopropyl-; preparation of D-valine from, by stereoselective biocatalysis, 343
Hydroformylation
of cyclododecatrienes; example of catalytic selectivity induced by chelation, 353
homogeneous Rh complex-catalysed, and related reactions of functionally substituted olefins, 15
and isomerization reactions of hex-1-ene catalysed by Rh(I) complexes, 335
reactions; influence of various azolate bridging ligands on catalytic activity of dinuclear Rh(I) precursors in, 1
Hydrogenation
alkene; correlation of rates of, catalysed by Rh complexes, 27
catalytic; high selectivity in, of acyl-substituted pyridines in alkaline solution; effect of complexation by β-cyclodextrin, 21
selective, of cinnamic aldehyde $C_6H_5CH{=}CHCHO$ to unsaturated alcohol catalysed by iridium phosphine systems, 35
Hydrogenolysis
catalytic, of esters, comparative study of reactions of simple formates and acetates over Cu on silica, 79
Hydrolysis
of raffinose by immobilized cells of *Saccharomyces oleaceus*, 281
and reductive hydrolysis of nitridomolybdenum(VI) complexes; model reaction in purported catalytic cycles of dinitrogen fixation, 141

Immobilization
catalytic activity of some immobilized dirhodium complexes with one bridging thiolato and one bridging chloro ligand, 199
characterization of immobilized urease membrane on silicon nitride layer, 293
hydrolysis of raffinose by immobilized cells of *Saccharomyces oleaceus*, 281
immobilized enzymes on acrylic supports, 259
Iridium
selective hydrogenation of cinnamic aldehyde $C_6H_5CH{=}CHCHO$ to unsaturated alcohol catalysed by iridium phosphine systems, 35

Iron
ions; photo-oxidation of dissolved formic acid by gaseous oxygen in presence of, 267
oxidation of water by $Ru(bpy)_3^{3+}$ in presence of Co(III) and Fe(III) colloidal hydroxides as catalysts, 171
Isomerization
and hydroformylation reactions of hex-1-ene catalysed by Rh(I) complexes, 335
Isopropylhydantoin
D,L-5-; preparation of D-valine from, by stereoselective biocatalysis, 343

Magnesium
theoretical EHT study of isobutene adsorption on model clusters of first series transition metal oxides and MgO, 303
Membrane
immobilized urease; characterization of, on silicon nitride layer, 293
Metathesis
photoinduced, of olefin catalysed by $W(CO)_5L–AX_n$ system, 161
Molecular orbital calculations
EHMO calculations for chain growth process in Fischer–Tropsch synthesis on supported Group VIII metals, 381
Molybdenum
hydrolysis and reductive hydrolysis of nitridomolybdenum(VI) complexes; model reaction in purported catalytic cycles of dinitrogen fixation, 141

Nickel
dimerisation of ethylene into 1-butene over supported tailor-made Ni catalysts, 93
Nitric oxide
mechanism of reaction NO + NH_3 on V_2O_5 catalysts, 359
Nitriles
aromatic; synthesis of, by vapour phase catalytic ammoxidation, 117

Olefins: see Alkenes
Oxidation
catalyst; calorimetric study of acid–base properties of, 327
photo-, of dissolved formic acid by gaseous oxygen in presence of iron ions, 267
role of, by heteropolyacid in polycondensation of benzyl alcohol to polybenzyl initiated by its acid catalysis, 221
of water by $Ru(bpy)_3^{3+}$ in presence of Co(III) and Fe(III) colloidal hydroxides as catalysts, 171
Oxonation
Ru 'melt' catalysed, of internal olefins; syngas reactions, 65
Oxygen
gaseous; photo-oxidation of dissolved formic acid by, in presence of iron ions, 267
2-pyridylethyl copper complex fixed on silica and its dioxygen adduct, 31

Phosphorus
electronic and steric effects of phosphine ligands in formation of ethylene glycol from synthesis gas catalysed by Rh, 249
promoting effect of acids on formation of ethylene glycol from synthesis gas catalysed by Rh–tricyclohexylphosphine system, 127
selective hydrogenation of cinnamic aldehyde $C_6H_5CH=CHCHO$ to unsaturated alcohol catalysed by iridium phosphine systems, 35
Photochemical conversion
of methane, 371
Photoinduced metathesis
of olefin catalysed by $W(CO)_5L–AX_n$ system, 161
Photo-oxidation
of dissolved formic acid by gaseous oxygen in presence of iron ions, 267
Platinum
preparation, characterization and NMR spectra of, on alumina catalysts in relation to their activity and stability, 213
stabilization and characterization of small Pt clusters (<1 nm) on TiO_2 powders via citrate reduction, 183
Polycondensation
role of oxidation by heteropolyacid in, of benzyl alcohol to polybenzyl initiated by its acid catalysis, 221

Polyorganosiloxanes
sulphonated, and their acid catalysis; preparation of, 41

Raffinose
hydrolysis of, by immobilized cells of *Saccharomyces oleaceus*, 281
Rhodium
catalytic activity of some immobilized dirhodium complexes with one bridging thiolato and one bridging chloro ligand, 199
complexes; correlation of rates of alkene hydrogenation catalysed by, 27
electronic and steric effects of phosphine ligands in formation of ethylene glycol from synthesis gas catalysed by, 249
homogeneous Rh complex-catalysed hydroformylation and related reactions of functionally substituted olefins, 15
hydroformylation and isomerization reactions of hex-1-ene catalysed by Rh(I) complexes, 335
inelastic electron tunnelling spectral (IETS) study of $Rh_6(CO)_{16}$ and $Rh_4(CO)_{12}$ absorbed on alumina, 315
influence of various azolate bridging ligands on catalytic activity of dinuclear Rh(I) precursors in hydroformylation reactions, 1
promoting effect of acids on formation of ethylene glycol from synthesis gas catalysed by Rh–tricyclohexylphosphine system, 127
thermal decomposition of $Rh_6(CO)_{16}$ on α-alumina, 7
Ruthenium
oxidation of water by $Ru(bpy)_3^{3+}$ in presence of Co(III) and Fe(III) colloidal hydroxides as catalysts, 171
Ru 'melt' catalysed oxonation of internal olefins; syngas reactions, 65

Saccharomyces oleaceus
hydrolysis of raffinose by immobilized cells of, 281

Silicon
silica; comparative study of reactions of simple formates and acetates over Cu on; catalytic hydrogenolysis of esters, 79
silica and its dioxygen adduct; 2-pyridylethyl copper complex fixed on, 31
silicon nitride layer; characterization of immobilized urease membrane on, 293
sulphonated polyorganosiloxanes and their acid catalysis; preparation of, 41
Silver
Ag(I) compounds and acetone; oxidative dimerisation of ammonia by peroxydisulphate ion in presence of, 193
Spectroscopy
FT–IR study of surface of copper oxide, 225
inelastic electron tunnelling spectral (IETS) study of $Rh_6(CO)_{16}$ and $Rh_4(CO)_{12}$ absorbed on alumina, 315
preparation, characterization and NMR spectra of Pt on alumina catalysts in relation to their activity and stability, 213
Sulphur
catalytic activity of some immobilized dirhodium complexes with one bridging thiolato and one bridging chloro ligand, 199
oxidative dimerisation of ammonia by peroxydisulphate ion in presence of Ag(I) compounds and acetone, 193
preparation of sulphonated polyorganosiloxanes and their acid catalysis, 41
Surface
FT–IR study of, of copper oxide, 225
Syngas reactions
Ru 'melt' catalysed oxonation of internal olefins, 65
Synthesis
of aromatic nitriles by vapour phase catalytic ammoxidation, 117
Fischer–Tropsch:
EHMO calculations for chain growth process in, on supported Group VIII metals, 381
secondary reactions of primary products of; role of ethene, 237

Synthesis gas
electronic and steric effects of phosphine ligands in formation of ethylene glycol from, catalysed by Rh, 249
promoting effect of acids on formation of ethylene glycol from, catalysed by Rh–tricyclohexylphosphine system, 127

Thermal decomposition
of $Rh_6(CO)_{16}$ on α-alumina, 7
Titanium
stabilization and characterization of small Pt clusters (<1 nm) on TiO_2 powders via citrate reduction, 183
Transition metal oxides
first series, and MgO; theoretical EHT study of isobutene adsorption on model clusters of, 303

Tungsten
photoinduced metathesis of olefin catalysed by $W(CO)_5L$–AX_n, system, 161

Valine
preparation of D-valine from D, L-5-isopropylhydantoin by stereoselective biocatalysis, 343
Vanadium
mechanism of reaction NO + NH_3 on V_2O_5 catalysts, 359

Water
oxidation of, by $Ru(bpy)_3^{3+}$ in presence of Co(III) and Fe(III) colloidal hydroxides as catalysts, 171
